**Enquiry for vibration isolated support for Breadboards**

We are interested to purchase passive vibration isolated support (Interconnected legs) for two Breadboards as per the dimensions given below.

- a. Breadboard size 900×1200 mm
- b. Breadboard size 900×900 mm

Interconnected legs specifications:

1. The isolated legs should be interconnected by pneumatic tubes for air filling.
2. The pressure of air to be filled should be 25-35 PSI.
3. Air filters should be provided for the moist free air to the system to avoid condensation.
4. The system should effectively isolate vibrations in the critical range of 10-50 Hz.
5. System should isolate Vertical and Horizontal natural frequencies of 4-8 Hz effectively.
6. Portable air compressor should be provided along with the system.

**Following details are also required:**

1. Delivery period
2. Warranty details
3. List of users in India with contact details

**Terms and Conditions:**

1. Validity of quotation must be of 60 days minimum
2. Price should be on FOR destination basis

Kindly send your offer in a sealed envelope mentioning the enquiry number on the top. The last to receive the quotation is **Oct 03, 2015** at the following address:
